## Project Overview

**Objective:** The objective of this system is to manage loan disbursement and daily EMI collection through field agents across multiple regions (mandals and villages).

The system will:

- Register customers
- Approve/reject loans based on eligibility
- Track daily collections
- Monitor overdue and risky customers
- Provide region-based access and alerts

## Stakeholders:

| Role     | Responsibility                       |
|----------|--------------------------------------|
| Admin    | Manage system, agents, rules         |
| Agent    | Register customers, collect payments |
| Customer | Repayment                            |

## System Architecture Overview:

Admin → Mandal → Village → Agent → Customer → Loan → Payment → Alerts

## Module Mapping (Vision plus Reference):

| Module              | Description            | VisionPlus Equivalent |
|---------------------|------------------------|-----------------------|
| Customer Management | Customer data handling | CDM                   |
| Loan Management     | Loan lifecycle         | CMS                   |
| Transactions        | Daily payments         | TRAMS                 |
| Alerts & Risk       | Monitoring             | FAS                   |
| Inquiry             | Lookup                 | CMS Inquiry           |

# Functional Requirements

**Customer Management (CDM):** Capture and manage customer details.

## Customer Inputs:

- Name, Address
- Aadhar, PAN
- Phone, Income, Age
- Nominee details
- Loan required

## Features:

- New customer registration
- Existing customer lookup
- Duplicate detection (PAN/Aadhar)

## Business Rules:

- Customer must pass KYC validation
- Duplicate records should be flagged

**Loan Management (CMS):** Handle loan approval and lifecycle

## Features:

- Loan request processing
- EMI plan selection (1/3/6/9 /12/15months)
- Daily EMI calculation
- Loan account creation

## Business Rules:

Eligibility based on:

- Income
- Past history
- Rejected customers: Block for 3 months

## Top-up loans allowed if:

- No overdue
- Good repayment history

**Collection Management (TRAMS):** Manage daily EMI collections.

## Features:

- Daily due list
- Payment entry: Paid / Not Paid
- Advance payment handling
- Skip logic

**Business Rules:**

- Advance payment: Future days marked as paid
- Missed payment: Increase overdue count
- Early closure: Loan marked as closed, Removed from due list

**Inquiry Module (CMS Inquiry):** Search, view and update customer/loan details.

**Features:**

**Search by:** Customer ID, Name

**Output:**

- Personal details
- Loan details
- Balance
- Overdue
- Missed payments
- Transaction history
- Loan status

**Alerts & Monitoring (FAS):** Track risky and overdue customers.

**Features:**

- Missed payments tracking
- Overdue alerts
- Risk classification

**Alert Types:**

- Missed > 3 days
- High overdue amount
- Frequent defaulters

**Agent View:** Only their village data

## **Admin Module**

**Features:**

- Create Mandal's
- Create Villages
- Assign Agents
- Define rules (penalty, eligibility)

# Access Control

## Role-Based Access:

| Role  | Access                |
|-------|-----------------------|
| Admin | Full access           |
| Agent | Only assigned village |

## Rule:

- Agent can only:
- View their customers, update customer details
- Update their collections
- See alerts for their region

# Data Requirements

## Core Entities:

- Customer
- Loan
- Payment
- Agent
- Alerts

## Key Attributes:

**Customer:** Customer Id, Name, Address, Pan, Aadhar

**Loan:** Loan ID, Amount, EMI plan, Status

**Payment:** Date, Amount, Status

# Business Rules (Critical Section)

## Loan Rules:

- EMI plans: 1 / 3 / 6 / 9 /12/15 months
- Daily EMI = Loan / tenure

## Rejection Rule:

If rejected → cannot apply for 3 months

## Payment Rules

- Advance payment allowed
- Skip allowed if already paid

- Missed payment → overdue
- Fore closure

## Closure Rule

**If fully paid early:**

- Mark closed
- Remove from active list

## Agent Restriction

**Agent sees only:** WHERE VILLAGE-ID = AGENT-VILLAGE

## Exception Handling

- Invalid KYC data
- Duplicate customer
- Payment mismatch
- Invalid loan request
- Foreclosure handling

## Reports (Online for now)

- Daily collection summary
- Agent performance
- Village-wise report
- Overdue report

## Process Flow Summary

Customer Registration → Eligibility → Loan Approval

Daily Collection → Payment Update

Overdue Tracking → Alerts

Inquiry & Monitoring

## Non-Functional Requirements

- Security (role-based access)
- Performance (fast lookup)
- Data integrity
- Audit logging

# **Audit & Logging**

## **System must track:**

- Who created customer?
- Who approved loan?
- Who updated payment?
- Timestamp of actions
